for the Rail Industry***

Propane Cylinder Cabinet

ARMS' Propane Cylinder Cabinet provides room for up to eight propane cylinders. The bank of cylinders are plumbed together for up to 240# of propane. Using smaller cylinders makes it easier to transport propane to the site. The cylinders are stored in an all-steel, welded cabinet that has a locking "T"-handle for access and a padlock hasp for added security. It is also fitted with a slanted roof, expanded metal sides, tubular hinged doors, and 3 locations for safety placards. The resulting system is an easy-to-use alternative for remote generator installations.

Cabinet:

- ***1-1/2" angle and 16-gauge steel***
- ***1/2" 16-Gauge expanded metal sides***
- ***Welded tubular door hinges***
- ***Powder-Coated white***
- ***Locking "T" handle w/ padlock hasp***
- ***Angled 16-Gauge roof for rain deflection***
- ***All-steel, welded construction***
- ***Three locations for safety placards***
- ***Can be anchored to concrete slab***
- ***Made in America***

Cylinders:

- ***Up to 240# of storage (8ea—30# cylinders)***
- ***Smaller cylinders are easier to transport***
- ***Ball-valves on each hose allow "hot-swap"***
- ***Standard OPD valve can be filled locally***
- ***Filled weight of each cylinder is less than 70lbs***
- ***Available with 20#, 30#, or 40# cylinders (only available with 4 each, 40# cylinders)***
