

# Power-One Converters

**Short Description:**  
Rugged, Reliable, Quality  
AC-DC and DC-DC Converters

## **High Density Board-Mount:**

PCB-Mount DC-DC Converters are available from 4 to 35 watts and offer high efficiency, advanced thermal-management, isolation, and zero derating.

## **Switching Regulators:**

Obtain the reliability of a switching power supply, where electronic isolation is not required. Efficiencies to 96%, Low input-output differential voltage, and zero derating.

## **Cassette Converters:**

Available in AC-DC or DC-DC Converters, Power-One Cassettes provide communications-grade power in robust applications. Proven reliability in Rail applications.

## **Din-Rail AC-DC Converters:**

The W (240W) and X (480W) series of AC-DC Din-Rail Mount Converters provide solid, reliable, 24V or 48V power. Also available in Battery Charger versions.

## **Available Model Numbers:**

Contact ARMS, Inc. to discuss the AC-DC or DC-DC converter and accessories to best fit your application. There are many functional options that can be applied to standard models including voltage adjustment, inhibit (on/off) functions, alarming/signaling, and current sharing.
